Hi Bob,

Attached are the cover letters for the Third Quarter 2015 Groundwater Monitoring Reports.

The reports have been uploaded and made available to you via AMRDEC.

V/r,  
Raelynn

Subject: [Non-DoD Source] Quarterly groundwater and drinking water reports for Red Hill

Aaron,

Can you provide the latest monitoring report for the groundwater wells as well as the drinking water data from the Red Hill Shaft? To date, the last report we have seen was the one for the January 2015 sampling event.

We have heard that recent analytical results have shown some increases in TPH levels in monitoring well #2 (RHMW02), as well as detections of chemicals of concern in samples taken from the Red Hill Drinking Water shaft. We were asked about this recently by the Board of Water Supply. You can understand that it is important that DOH and EPA have access to this data as soon as possible, certainly before the public or other organizations have access to the data.

Monitoring reports for the quarterly drinking water and groundwater sampling events, as well as the monthly vapor monitoring results need to be provided to the regulatory agencies on at least a quarterly basis. Therefore we should have the monitoring reports for the April and July 2015 sampling events. To date I have not seen either of these.

In the past I understand that the protocol was to provide these reports to DOH only. In the future please also send these reports to me as well. Electronic versions would obviously be preferred.

Please contact me with any questions.
